« i-RTCT »

Modulation des réponses des cellules T Anti-tumorales chez des patients atteints de cancer traités par radiochimiothérapie concomitante

<p>Experimental: Biological samples</p> <p>Blood samples will be collected at baseline, at J15/J20 after RTCT initiation, and then 1 month, 3 months and 12 months after the end of RTCT treatment, and at disease progression if applicable.</p> <p>Tumor tissues will be collected if available.</p> <p>Intervention: Other: Biological samples</p>

VALIDATION DES CRITERES DE SELECTION

Critères d'inclusion :

Histologically confirmed NSCLC (Non Small Cell Lung Cancer) or SCLC (small cell lung cancer) OR histologically confirmed Head and neck cancer	<input type="checkbox"/> oui <input type="checkbox"/> non
Patient candidate to a first-line concomitant radiochemotherapy	<input type="checkbox"/> oui <input type="checkbox"/> non
Written informed consent	<input type="checkbox"/> oui <input type="checkbox"/> non

Critères de non inclusion :

Sequential radiochemotherapy, exclusive radiotherapy, or stereotactic radiotherapy	<input type="checkbox"/> oui <input type="checkbox"/> non
History of adjuvant radiochemotherapy for cancer treatment	<input type="checkbox"/> oui <input type="checkbox"/> non
Patients under immunotherapy, chemotherapy or other immunosuppressive drugs (prednisone or prednisolone ≤ 10 mg/day is allowed)	<input type="checkbox"/> oui <input type="checkbox"/> non
HIV, hepatitis C or B virus	<input type="checkbox"/> oui <input type="checkbox"/> non
Patients with any medical or psychiatric condition or disease	<input type="checkbox"/> oui <input type="checkbox"/> non
